JUNE 2026

Hello Summer!

# Goshen County Weed & Pest NEWSLETTER

Goshen County Weed & Pest

## ROUNDUP QUICKPRO SC

Roundup QuikPro SC has three active ingredients, 20% Glyphosate, 1% Diquat, and 0.1% Indaziflam. The addition of Diquat along with a new surfactant gives you even a faster burn down. This product is a post-emergence, systemic herbicide. It is generally non-selective and gives control of many annual weeds, perennial weeds, woody brush and trees. GCWP carries this product and is happy to give you the correct instructions to help control the bare ground plants you like to keep clear of during the summer.

## COMMERCIAL SPRAY OPERATORS IN GOSHEN COUNTY

Goshen County Weed & Pest in past years was able to hire enough seasonal spray operators to not only treat county roads and state highways. But also help out some landowners who are fighting invasive species as well. Nowadays, it just doesn't seem like there are enough applicants to offer services to private landowners.

**YOU ARE IN LUCK!**

Goshen County has some reliable spray businesses who are happy to work with you on unwanted plants on your property.

Here is how to contact them:

**Lofinks Panhandle Lawn Care**
**308-646-6496**

**Wyo/Braska Weed & Pest**
**Buck 307-214-5481**

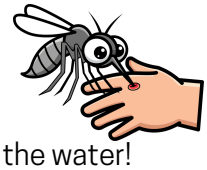
**LB Spraying**
**Duane & Dalton 307-401-0663**

## DALMATIAN TOADFLAX

It's no secret that Goshen County is in a drought, this brings up concern of what will weeds do during the dry weather conditions. Well... unfortunately the plants will continue to compete for water and grow as much as possible to complete their cycle and seed out.

We have been seeing that Dalmatian Toadflax showed it's true colors and is thriving this spring. Its deep root system and waxy, thick leaves allow it to withstand drought while outcompeting native plants for lack of moisture. During dry spells, the plant's waxy cuticle thickens, which makes chemical control a challenge. Keep a look out for this plant, allthough mechanical control isn't always the answer. Pulling the plant or getting to it before seeding out will help tremdeously.

## EARLY MOSQUITO CONTROL



Now is a good time to drop those mosquito donuts in the water! Goshen County Weed & Pest has mosquito briquets and granular control for puddles, ponds and other standing water. The office also sales insecticide concentrate that an individual can use around their property.

## BUCKET OF DOOM

a highly effective mosquito trap that tricks female mosquitoes into laying eggs in standing water, then kills the larvae before they can hatch.

### WHAT WILL YOU NEED?

- *5-gallon bucket (darker color)*
- *Organic matter (grass clippings, dead leaves, etc.)*
- *Mosquito dunk/donut (containing acillus thuringiensis israelensis (Bti))*
- *Wooden stick (placed in bucket to help beneficial bugs escape)*
- *Cover bucket with wire to keep pets or children out*

**FILL BUCKET WITH CLIPPINGS, ⅔ FULL OF WATER AND DROP DONUT IN. PLACE OUTSIDE IN A SHADY AREA. DON'T LET YOUR BUCKET DRY OUT. THIS SHOULD LAST UP TO 30 DAYS!**

### STAY IN THE KNOW

- June 11th - GCWP Board Meeting
- July - Fourth of July (Office Closed)
